

## ***Rules for clever lessons***

1. At the beginning of a clever lesson take out your folder.
2. Have a look at the material. Decide which task you would like to take. Choose the suitable level of difficulty for you.
3. What is the task? Do you have to work alone, with a partner or in a group?
4. Work efficiently and quietly for around 30 minutes.
5. If you have questions or problems, try to solve them on your own first. Look up unknown words in a dictionary, e.g. If you can't solve the problem on your own, ask your partner / neighbour for help. If he/she can't help you, put your name card on the "help list". Your teacher will come and help you then.
6. After 30 minutes stop working. Go to the teacher's desk and take a solution sheet. Compare your answers with the solution. Bring back the solution sheet to the teacher's desk. If you had an oral task or a creative task, present your findings during presentation time.
7. Put all clever lesson material into your folder and bring it back to the shelf at the end of the lesson.
